

# HEI-PLADI Project

## Higher Education Innovation in PLAnt Diversity

Flexible learning paths for emerging labour market

**Prof.ssa Gabriella Stefania Scippa**  
Project coordinator

# Multiplier Event

**University of Warsaw**  
**May 16th-17th 2018**

HEIPLADI project, funded by the Erasmus+ K2 strategic partnerships (2015-2018) program, aimed at developing, testing and implementing an higher education course on plant biodiversity evaluation, conservation and management. HEIPLADI follows the priorities of 2011 EU Modernization Agenda to equip young generation with skills for new emerging green labour markets related with environment protection and conservation. The course includes ICT techniques in a blended path of virtual and physical mobility. Its implementation required the constructive cooperation and the successful integration of expertise between Botanic Gardens, Germplasm Banks and Higher Education Institutes from 6 EU countries.

The multiplier event is intended to present to Higher Education Institute stakeholder, i.e. students, teachers and staff, the Intellectual output (modules) developed and the results obtained from the HEIPLADI project implementation.
